SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) regulates exports of electricity from the United States to a foreign country, pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 42 U.S.C. 7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On October 20, 2021, BP Energy filed an application with DOE (Application or App.) to transmit electric energy from the United States to Mexico “for a term of five (5) years, or the

maximum period allowed.” App. at 1. BP Energy states that it “is a Delaware corporation and a wholly-owned indirect subsidiary of BP America Inc,” which “is an indirect, wholly-owned subsidiary of BP p.l.c. (“BP”), a company organized under the laws of England and Wales with its international headquarters in London, UK and its U.S. headquarters in Houston, Texas.” *Id.* at 2. BP Energy represents that “[n]either [it] nor any of its affiliates own or control electric transmission facilities except for those facilities that are necessary to connect generating facilities owned by affiliates to the transmission grid.” *Id.* at 5.

BP Energy further claims that its proposed purchases will come from “electric utilities, power marketers, federal power marketing agencies, and affiliated suppliers pursuant to voluntary agreements.” App. at 5. BP Energy contends that its proposed exports “do not and will not impair the sufficiency of the electric power supply within the United States.” *Id.* at 5-6. BP Energy adds that its exports “will not impede or tend to impede the regional coordination of electric utility planning or operations, but will instead conform to system requirements as they may change over time.” *Id.* at 6.

The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
